Introduction

Online College Magazine where college students and faculties can post and read various articles, thus promoting literary insight

1.1 Purpose

In conventional system the magazine is published on a paper and needs to be circulated among all. The main factors behind the motivation of this system are:

1. Not all students make it to the printed magazine.
2. Creativity of students needs to be nurtured.
3. Creating a user-friendly interactive place where students/faculties can share their ideas

Considering the above issues a system is user friendly online system is developed where all the users can post their articles,news.

1.2 Scope

- The users in the system are

Guest(anonymous)

Registered users(faculty/students)

Moderators

Administrator

- Guests can view the articles written in magazine and the comments but are restricted to post an article unless they are registered users
- The users can search the articles, sort the articles by date,name,rating.
- The moderator reviews the post before they are published in the magazine

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

- The administrator can view the performance of the moderators and the members
- The system contains archives of all the published articles
- The articles can be downloaded in various formats

1.3 Definitions, Acronyms and Abbreviations

- **Admin(Administrator):** He is entitled with the task of adding, deleting moderators. Accountable for changing the look of the system
- **OCM(Online college magazine):** It is an online system that enables its users to view and post articles regarding various issues in the college
- **HTML (Hyper Text Markup Language):** It is used to create static web pages.
- **JSP (Java Server Pages):** It is used to create dynamic web content.
- **J2EE (Java 2 Enterprise Edition):** It is a programming platform, belonging to the Java platform, which is used for developing and running distributed java applications.
- **WASCE (WebSphere Application Server Community Edition):** It is an application server that runs and supports the J2EE and the web service applications.
- **WSAD (WebSphere Studio Application Developer):** It is a designer toolkit which is designed to develop more complex projects by providing a complete dynamic web service.
- **DB2 (IBM Database 2):** It is a database management system that provides a flexible and efficient database platform to raise a strong "on demand" business applications.
- **HTTP (Hyper Text Transfer Protocol):** It is a transaction oriented client/ server protocol between a web browser and a web server.

1.5 Technologies to be used

DB2:

Database2: A database management system that provides a flexible and efficient database

platform to maintain records of students, teachers, admin and dm.

JSP

Java Server Pages. It is used to create dynamic web content.

J2EE

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Java 2 Enterprise Edition. A programming platform which is a part of java platform for developing and running distributed java.

UML

Unified Modeling Language is a standard language for writing software blueprints. The UML may be used to visualize, specify, construct and document

HTTP

Hypertext Transfer Protocol. It's a service protocol.

RAD

Rational Application Developer is a development tool that helps to design web pages and also helps to design the diagrams like ER, Database schema diagrams and to generate DDL.

XML(Extensible markup language): a metalanguage that allows users to define their own customized markup languages, esp. in order to display documents on the World Wide Web

1.6 tools to be used

RAD(Rational application developer) for coding

DB2(data base 2) for database

Rational rose for modeling

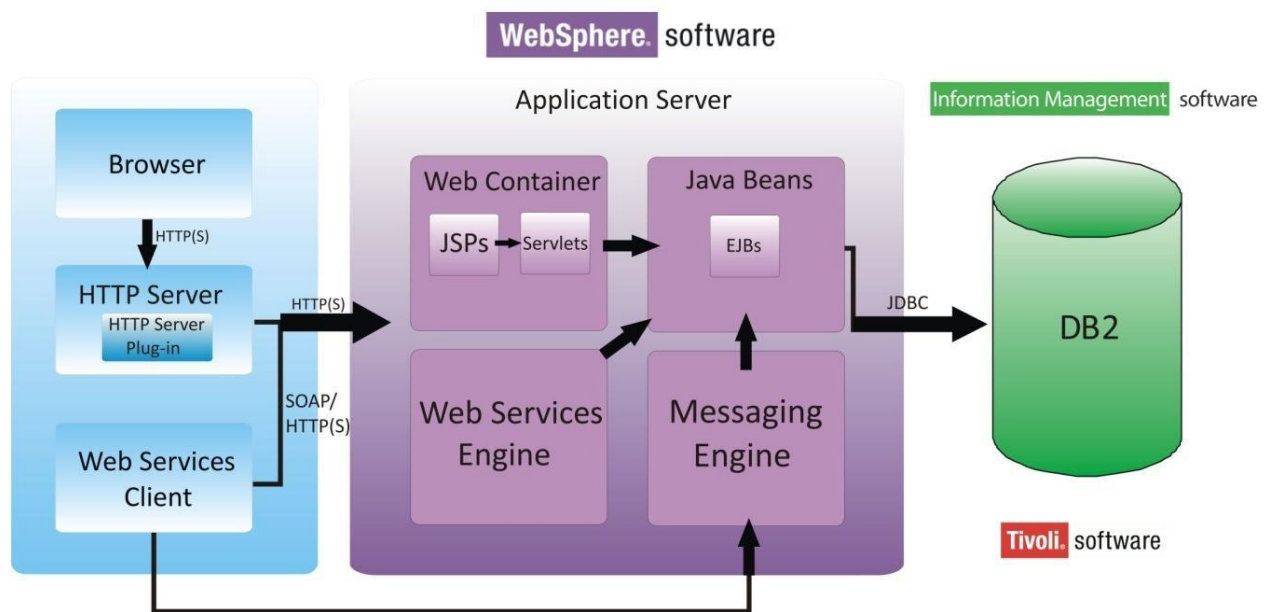

WASCE(Websphere application server) for maintaining server

| Software Requirements Specification | 15/02/2012 |

DB2, Operating System (any)

Development End

RAD (J2EE, Java, Java Bean, Servlets, HTML, XML, AJAX), DB2, OS
WebSphere(Web Server)

2.3 Hardware Interface

Minimum Requirements:

| Client side | | | |
|-----------------------|--|--------|------------|
| | Processor | RAM | Disk space |
| Internet Explorer - 6 | Intel Pentium III or AMD - 800 MHz | 128 MB | 100 MB |

| Server side | | | |
|-------------|--|--------|------------------------------------|
| | Processor | RAM | Disk space |
| RAD | Intel Pentium III or AMD - 800 MHz | 1 GB | 3.5 GB |
| DB2 | | 256 MB | 500 MB (Excluding Data Size) |

2.4 Communication Interface

- Client (customer) on Internet will be using HTTP/HTTPS protocol.
- Client (system user) on Internet will be using HTTP/HTTPS protocol.

|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

2.5 Constraints

- GUI is only in English.
- College Students/Faculties can only register as members (through unique IDs).
- The guest has got limited access.
- The articles will be posted only after acceptance by admin/moderators.
- Login and password is used for the identification of users.
- Only registered users will be authorized to post the article.
- Limited to HTTP/HTTPS.
- This system is working for single server.

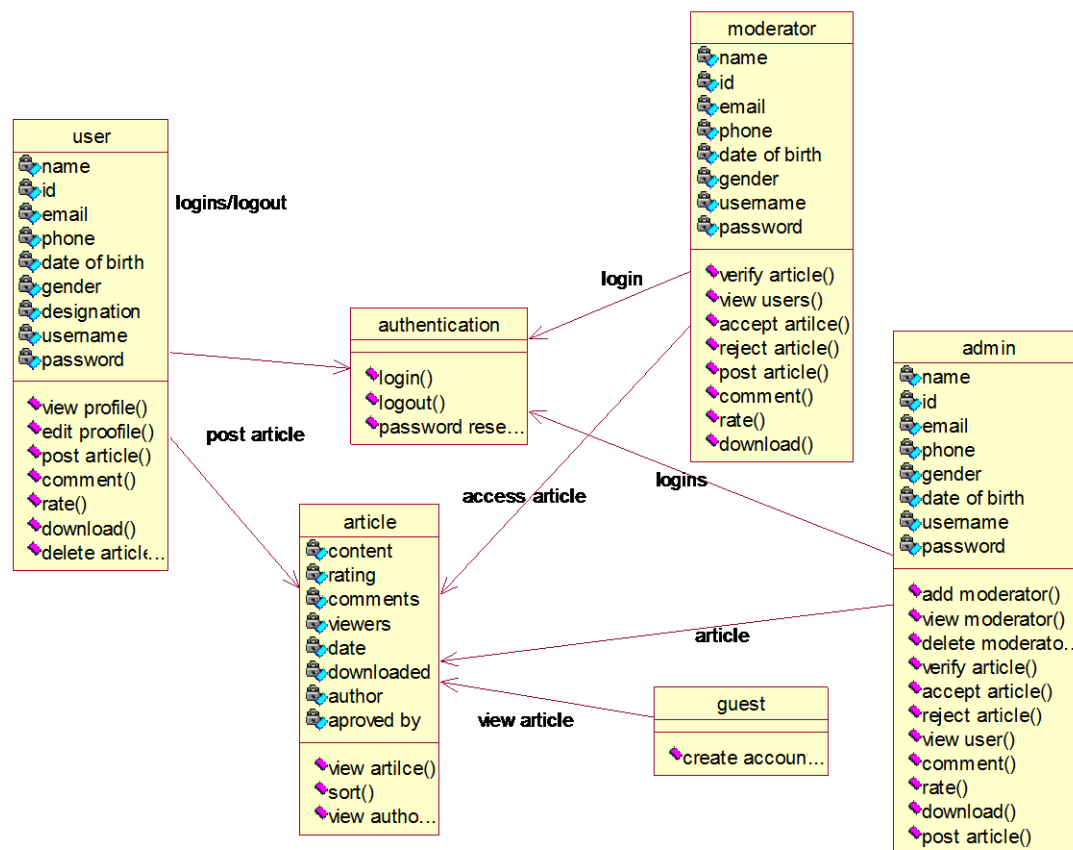

2.6 ER Diagram

| Software Requirements Specification | 15/02/2012 |

3.0 Specific requirements

3.1 Use case reports

Use case diagram for admin:

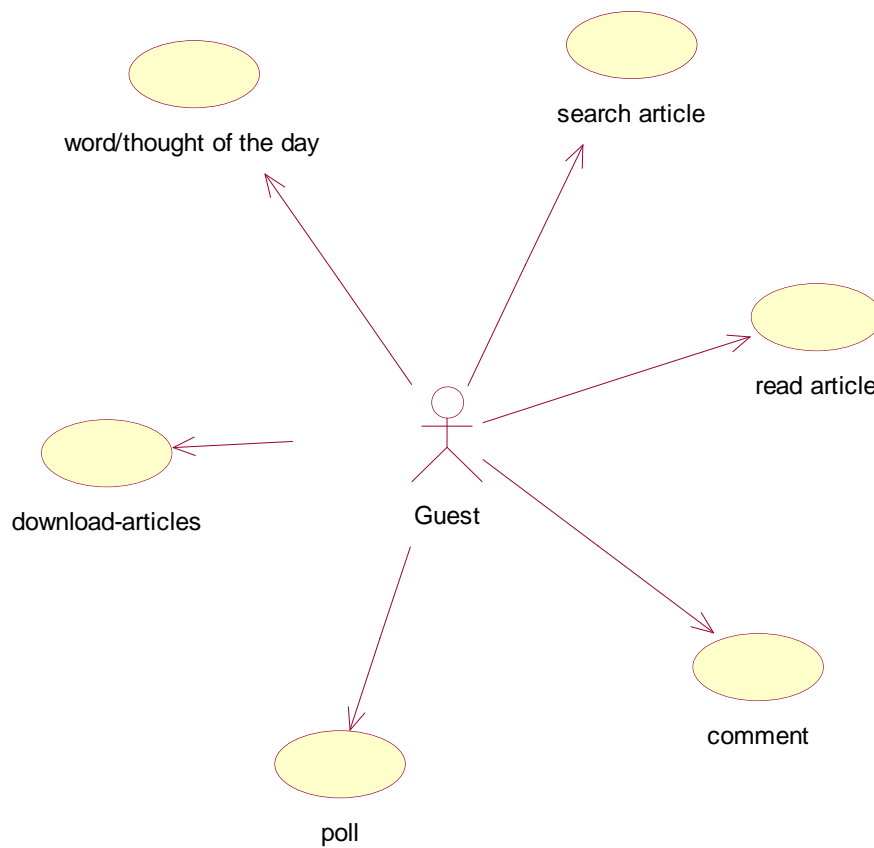

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

| Use case | description |
|------------------------|--|
| Select/reject articles | The admin can select or reject the articles posted by users |
| Send mails | The admin has to send the confirmation of article or the reason for rejection mail to the author |
| login | The admin can login with his username and password |
| View profile | The admin can view his profile |
| Edit profile | The admin can edit his profile |
| search | The admin can search the articles |
| Read article | The admin can read articles posted successfully |
| Post article | The admin can post article |
| discuss | The admin can participate in discussion forum |
| logout | The admin can logout through the system |
| reports | The admin can view the progress reports of the moderators |
| news | The admin can publish the news |
| privileges | The admin has to set the privileges of the moderator |
| Download articles | The admin can download the articles in various formats |
| poll | The admin can participate in polling |
| Comment | The admin can comment on the articles |
| Word of the day | The admin can access the word of the day |

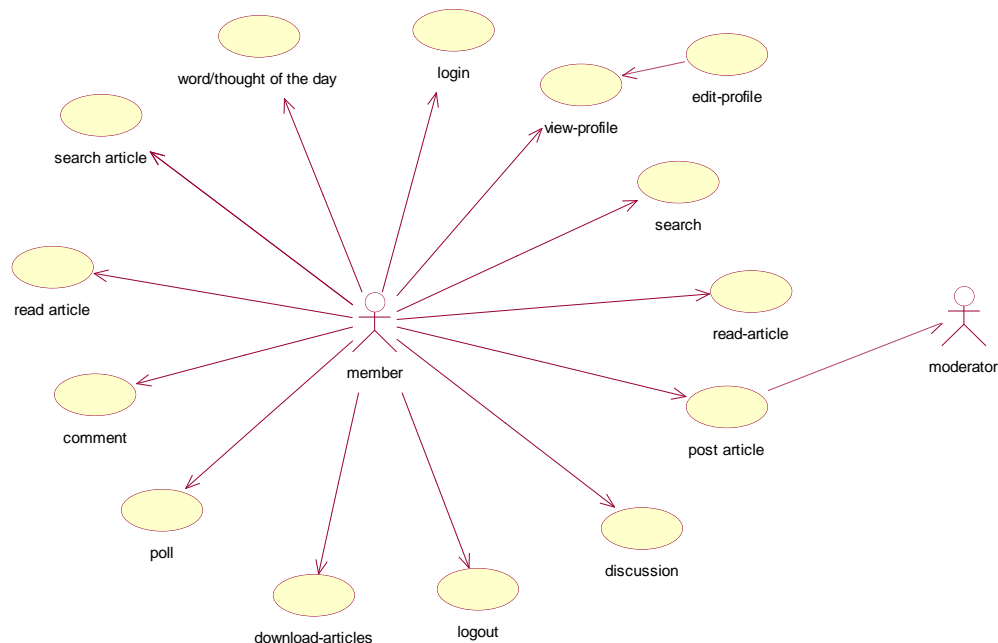

Use case diagram for guest:

| Usecase | Description |
|-------------------|--|
| search | The guest can search the articles |
| Read article | The guest can read articles posted successfully |
| Comment | The guest can comment on the articles |
| poll | The guest can participate in polling |
| Download articles | The guest can download the articles in various formats |
| Word of the day | The guest can access the word of the day |

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Use case diagram for member:

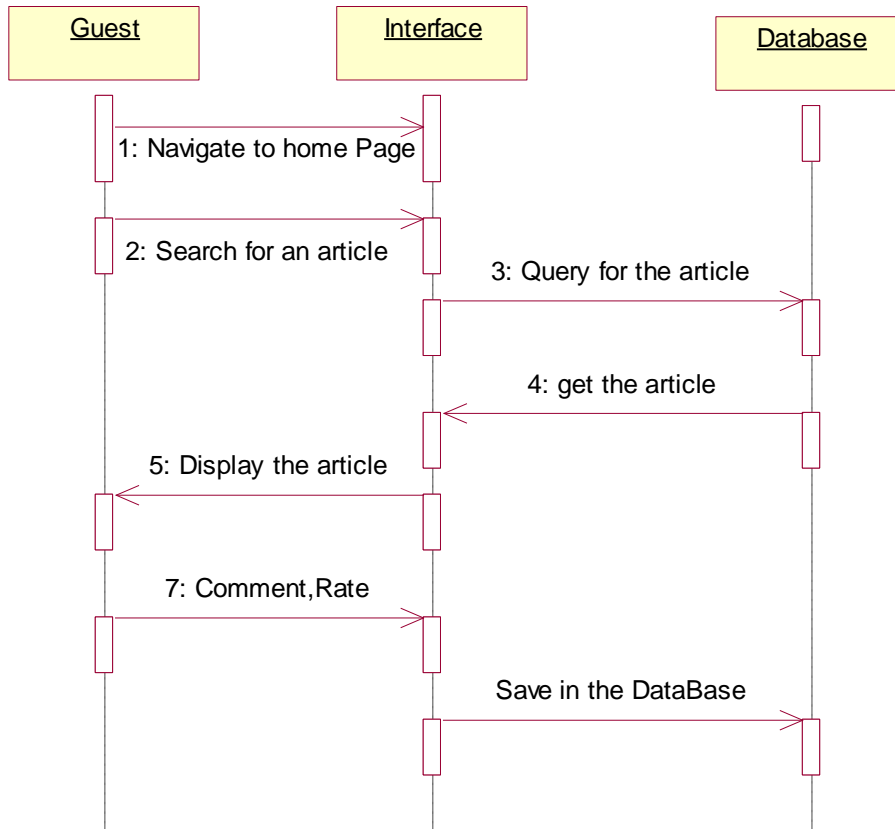

| Use case | description |
|-------------------|--|
| login | The member can login with his username and password |
| View profile | The member can view his profile |
| Edit profile | The member can edit his profile |
| search | The member can search the articles |
| Read article | The member can read articles posted successfully |
| Post article | The member can post article |
| discuss | The member can participate in discussion forum |
| logout | The member can logout through the system |
| reports | The member can view the progress reports of the moderators |
| news | The member can publish the news |
| Download articles | The member can download the articles in various formats |
| poll | The member can participate in polling |
| Comment | The member can comment on the articles |
| Word of the day | The member can access the word of the day |

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

3.2 Sequence Diagram

Sequence diagram for guest:

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Sequence diagram for post article:

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

3.3 Activity diagrams

Activity diagram for administrator:

The administrator has to provide the username for password for logging into the system. on successful authentication he will be navigated to the admin panel where he has got various functionalities like publish news, view reports, select newly posted articles, add/remove users, change privileges. For an newly posted article he can accept or reject. On accepting the article successful confirmation will be sent to the author of the article. On rejection of the article, reason will be provided.

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Activity diagram for moderator:

The moderator needs to be authenticated through username and password. He has the right to accept and decline articles. On rejection of the article , he has to provide the reason and the progress report of the moderator stating the number of articles received and number of articles accepted/rejected will be available to the admin.

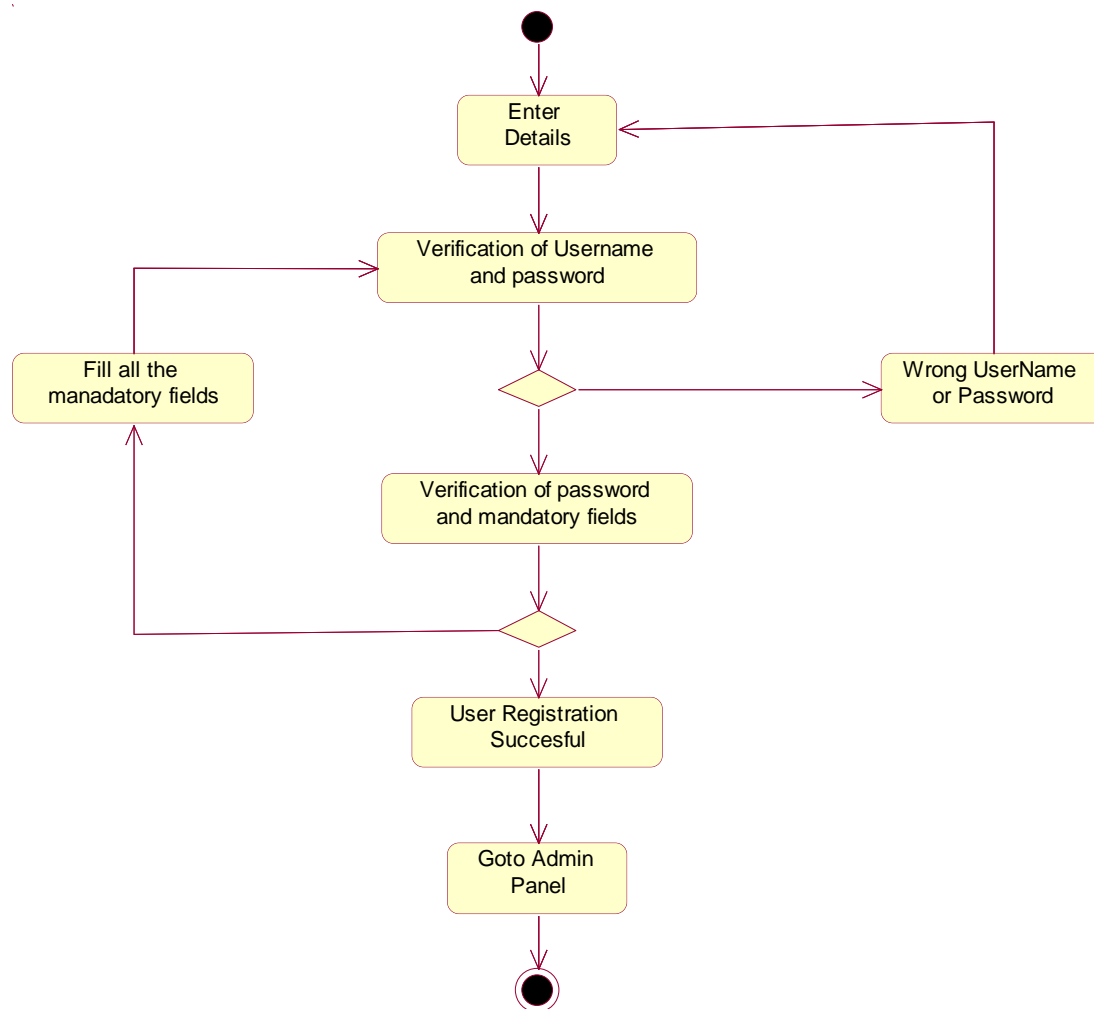

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Activity diagram for post article: the user needs to login with username and password and he can write the article which is sent for approval.

| | |
|-------------------------------------|-------------|
| Online college magazine | Version 2.0 |
| Software Requirements Specification | 15/02/2012 |

Activity diagram for registration: the user of the system has to enter the details during the registration and if the required criteria is not satisfied he will redirected to the registration page again and if everything is correct a confirmation message stating user registration successful is displayed.

Activity diagram for view article:

The capability to view,search,comment,rate the article is available to every user of the system. The user can search for the required article based on the tag. He can comment or rate the article. He can view the thought ,word of the day and he can also participate in the polling.
